Application-specific fastening solutions

Repositionable and reclosable

binder

Mission

We at Binder enable our customers to develop their potential.

We understand and identify the needs of our clients. Together, we develop and implement individual ideas.

Your success starts with our solutions

More than two centuries ago, in 1798, the impressive story of our family business began in Holzgerlingen, Germany. To this day, we at Binder are highly ingenious and we place great emphasis on quality and durability. We also have a certain penchant for perfection.

Our numerous developments and patents as well as our continuous search for innovative solutions are why we've risen to become a technology leader for high-tech fastener systems over the last two centuries. We are constantly expanding our innovative edge by relying on our own research and development and we collaborate with leading research institutes and universities. We develop and produce exclusively in Germany.

To us, our customers' tasks are an exciting challenge that we take on with a great deal of commitment, know-how and passion. Our goal is to enable companies in every industry to develop their potential with our fastening solutions and to differentiate themselves in the market.

"What started as a simple idea now opens up entirely new dimensions. We pride ourselves on meeting our customers' challenges with a diverse range of fastening solutions. Individual, tailor-made, for every industry.

Patrick Geffers Managing Director

Recommended fastening solutions

Our fastening solutions are always on the timetable when it comes to tram and railway carriage interiors. Whether roof liners or side wall cladding, from the seats to the flooring, they reliably ensure trouble-free connection. Our hook-and-loop fasteners are even used on the track bed.

Interior panelling

Secure, simple and quick fastening of interior panels. Also for very long and double-decker wagons, where large torsions can occur.

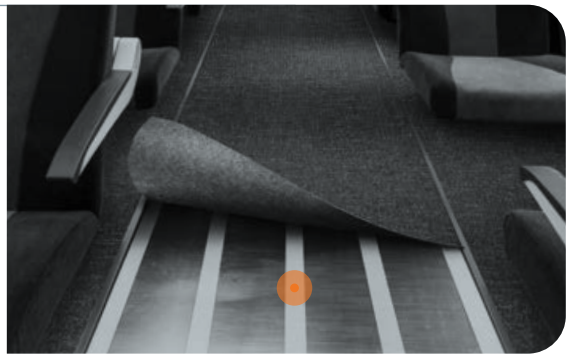

Duotec®, Pressotex®, Clips, Profiles, Klettostar®

Flooring

Rapid, easy and interchangeable fixation of flooring.

TUFF, Velour, Binder SoloHook®

Seating

Easy and secure fastening solutions – whether foam cushion, cover, armrest or headrest.

Klettostar®, Velour, Duotec®

Quality is a top priority for us

Whether sustainability, quality management or social responsibility – we set high standards for ourselves and also undergo external evaluation. Certificates and awards from independent institutes are very important to us and an ongoing incentive to become that little bit better.

OEKO TEX® STANDARD 100 10.0.83522 Hohenstein HTTI

OEKO TEX® STANDARD 100 94.0.0472 Hohenstein HTTI

OEKO TEX® STANDARD 100 04.0.8997 Hohenstein HTTI

Quality Management ISO 9001

Environmental Management ISO 14001

Energy Management ISO 50001

COMMITTED ecovadis Sustainability Rating OCT 2026

Flame-retardant
Most of our products, regardless of their construction (with or without adhesive, as a clip or profile variant, etc.), are flame-retardant and meet the DIN EN 45545-2 standard for the fire behaviour of materials and components.

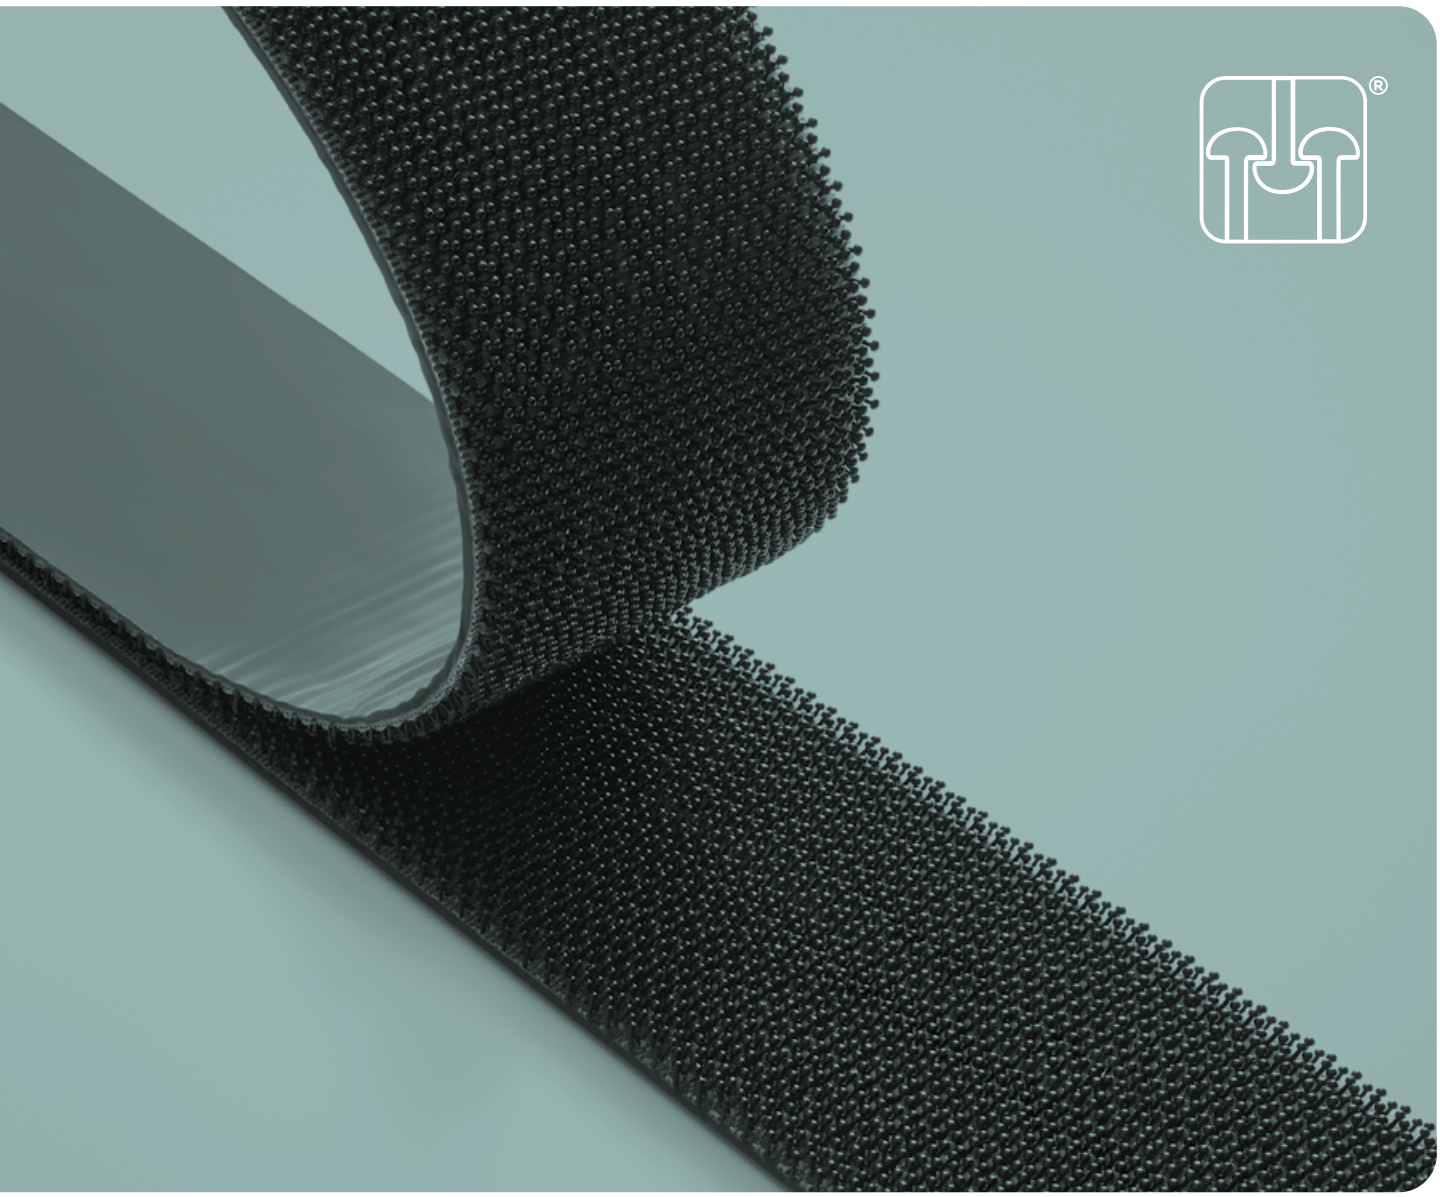

In-house laboratory
For us, customer satisfaction and confidence in our products comes first. To meet your high standard, we conduct our own in-house laboratory tests. These tests enable us to ensure that our fastening solutions meet the highest requirements.

Sustainability
Consideration for mono-component products is a viable option for many projects, allowing for both reduced raw material consumption and simplified recycling opportunities. We also strive to incorporate more recycled material within our products.

Lightweight
We provide you with high-performance solutions that enable weight-optimised fastening alternatives. Using less material reduces the amount of resources required to manufacture the product while also supporting a better logistic and end-user carbon footprint.

Duotec®

- Self-engaging reclosable fastener (SERF)
- High-security fastener - resistant to unintentional opening
- Very strong holding power after locking
- Defined level of force required to unlock
- Allows for opening and reattachment of the fastener by skilled personnel
- Standard colours: Duotec® 50 black and Duotec® 42 white

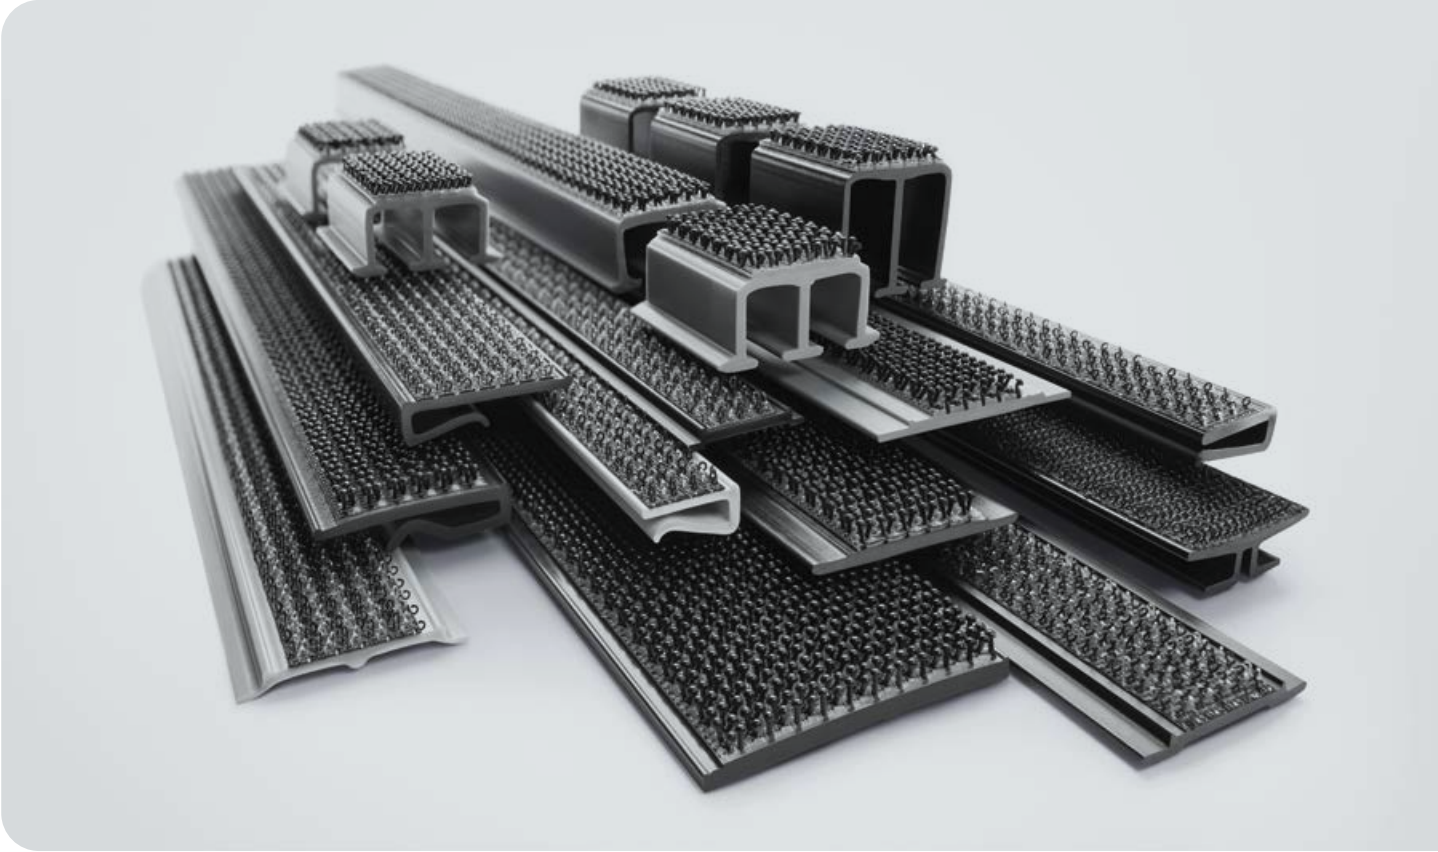

Available in three versions:

- **Clip solution:** quick and easy to install, compensates for installation tolerances
- **Profile solution:** can be glued to the body, can be adapted to gap dimensions, individual solutions possible
- **Self-adhesive solution:** quick and easy to position

Clips

- Injection-moulded products with our fasteners
- Flexible design with our own tools
- Securely engaged
- Quick fastening without rattling
- Tool-free installation
- Rotation-proof design
- Available for various clamp thicknesses and hole diameters
- Can be combined with various Binder fastening systems

Profiles

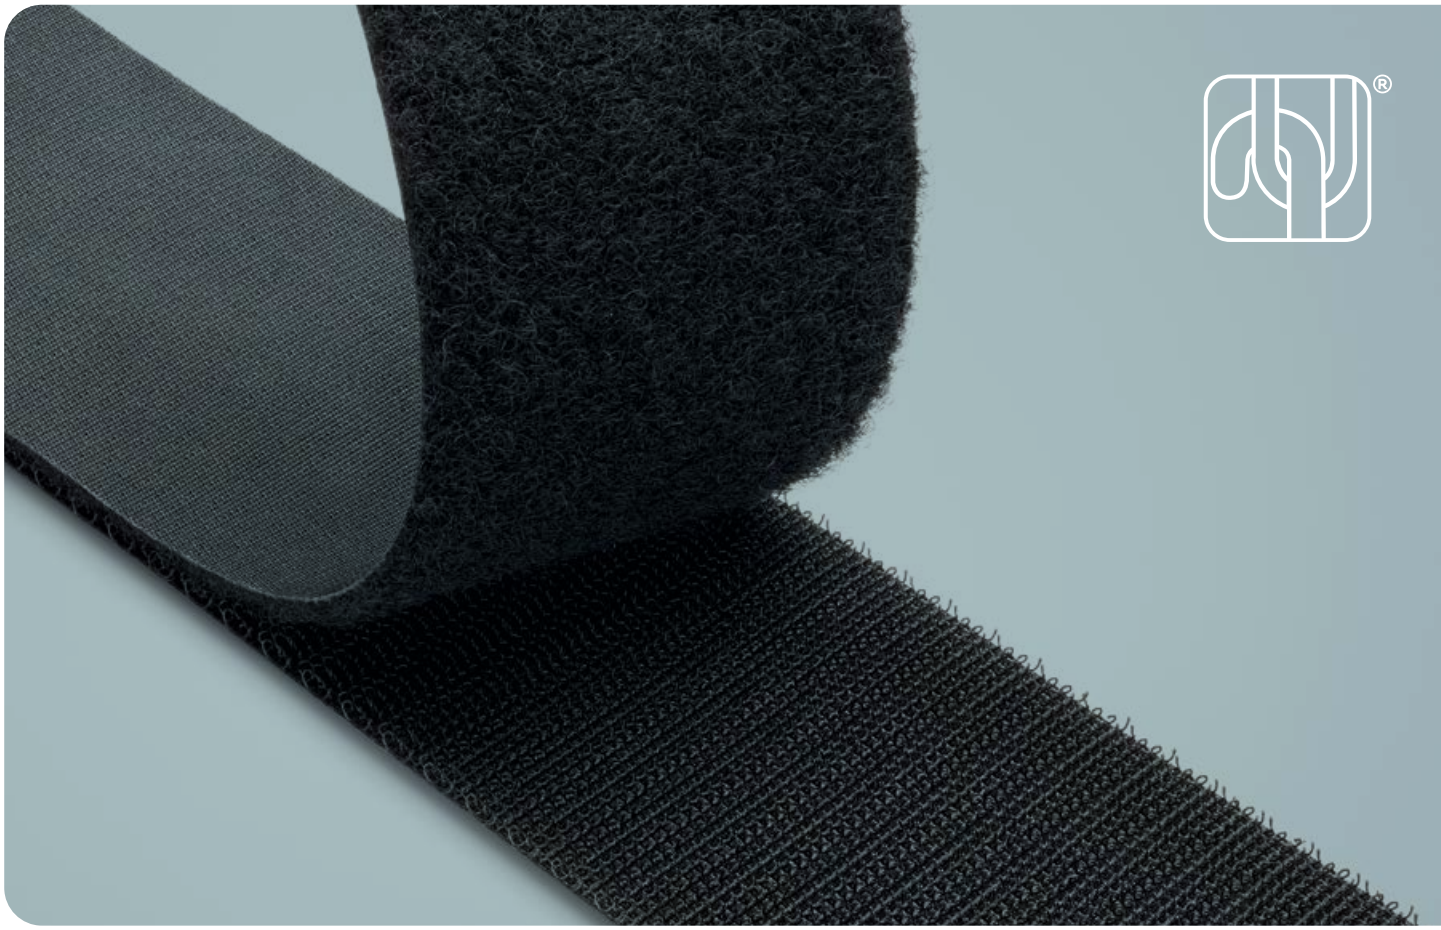

- Plastic profiles in combination with our fasteners
- Extruded plastic profiles, manufactured with our own tools
- For indoor and outdoor use
- Long service life
- Resistant to UV rays, ageing, water and chemicals
- Individual profile geometries and customised functionality possible
- Adaptable to gap dimensions

On board with you through town and country

Klettostar®

- Premium hook-and-loop fastener
- High number of opening and closing cycles
- Flame-retardant finishes for a variety of applications
- Self-adhesive and available as geometric shapes
- Available on profiles
- Back-to-back laminations possible
- Loop also available in 100% polyester

Klettostar® loop unbrushed

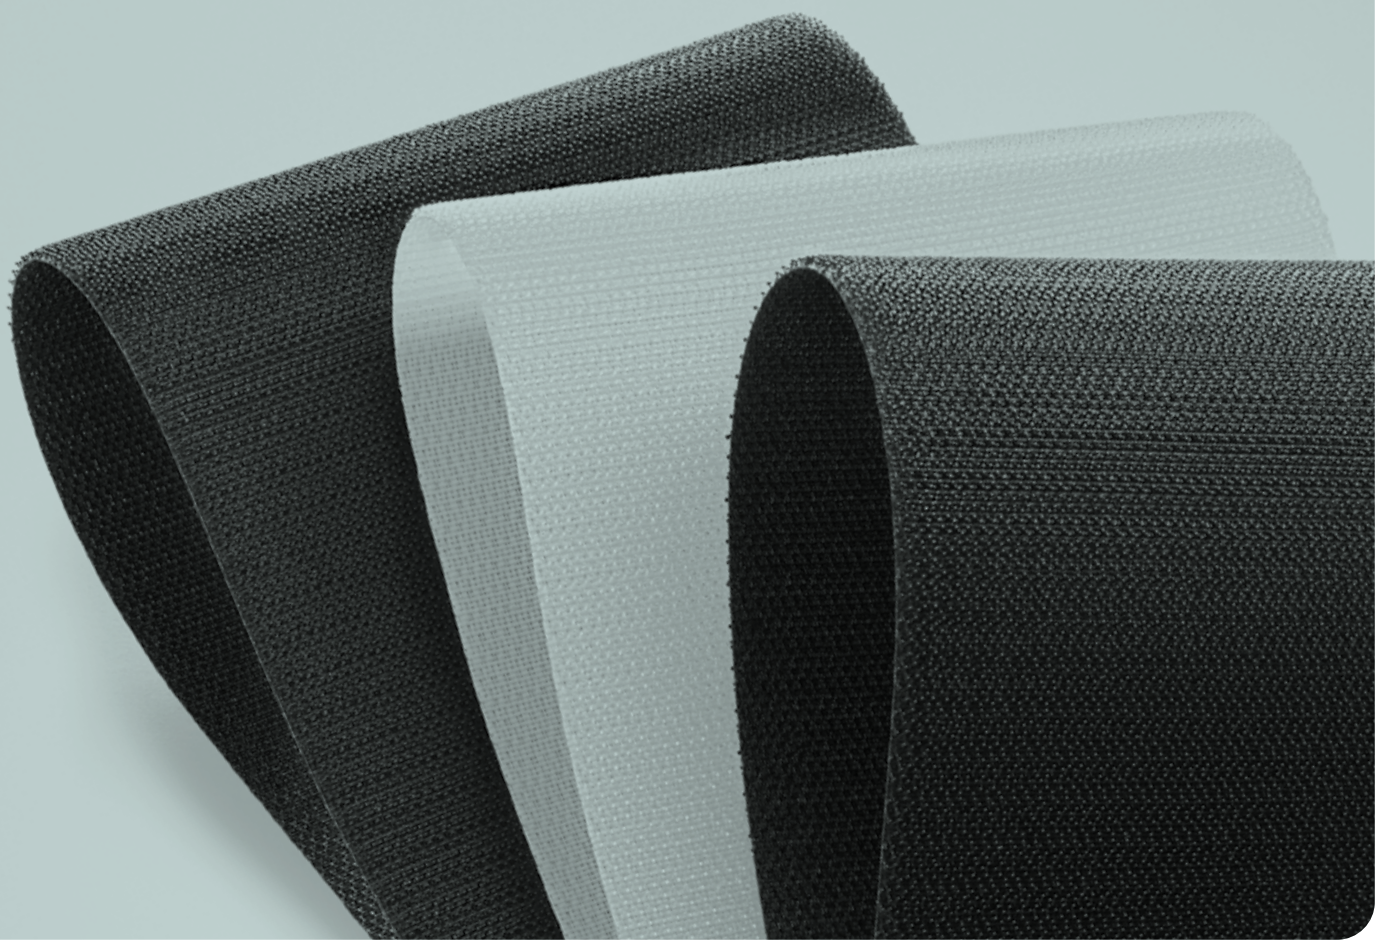

- Flame-retardant
- Very high tensile strength
- Available on profiles
- Can be repositioned and reclosed several times: enables selective disengagement and reuse after carrying out repairs and service work

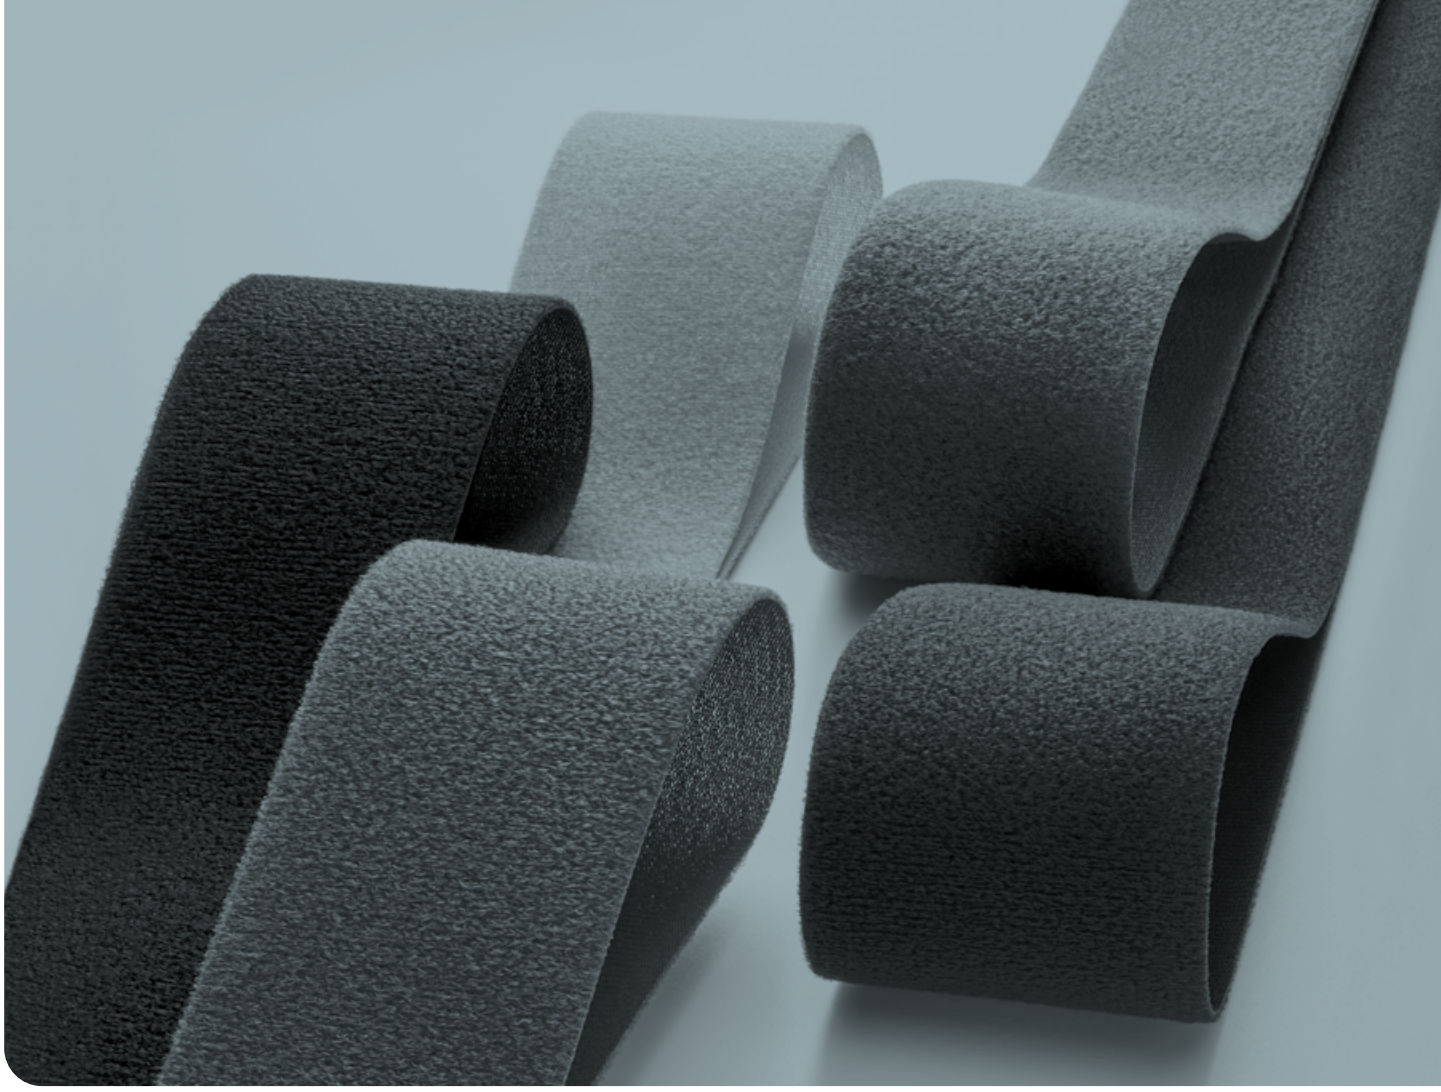

Pressotex® FR

- Woven mushroom-shaped fastener
- High tensile, peel and shear strength
- Self-adhesive and available as geometric shapes
- Available on profiles
- Back-to-back laminations possible
- Ideal in combination with Velour, as Velour allows a certain number of opening and closing cycles and reduces the fastening thickness
- High fastening forces even with light pressure

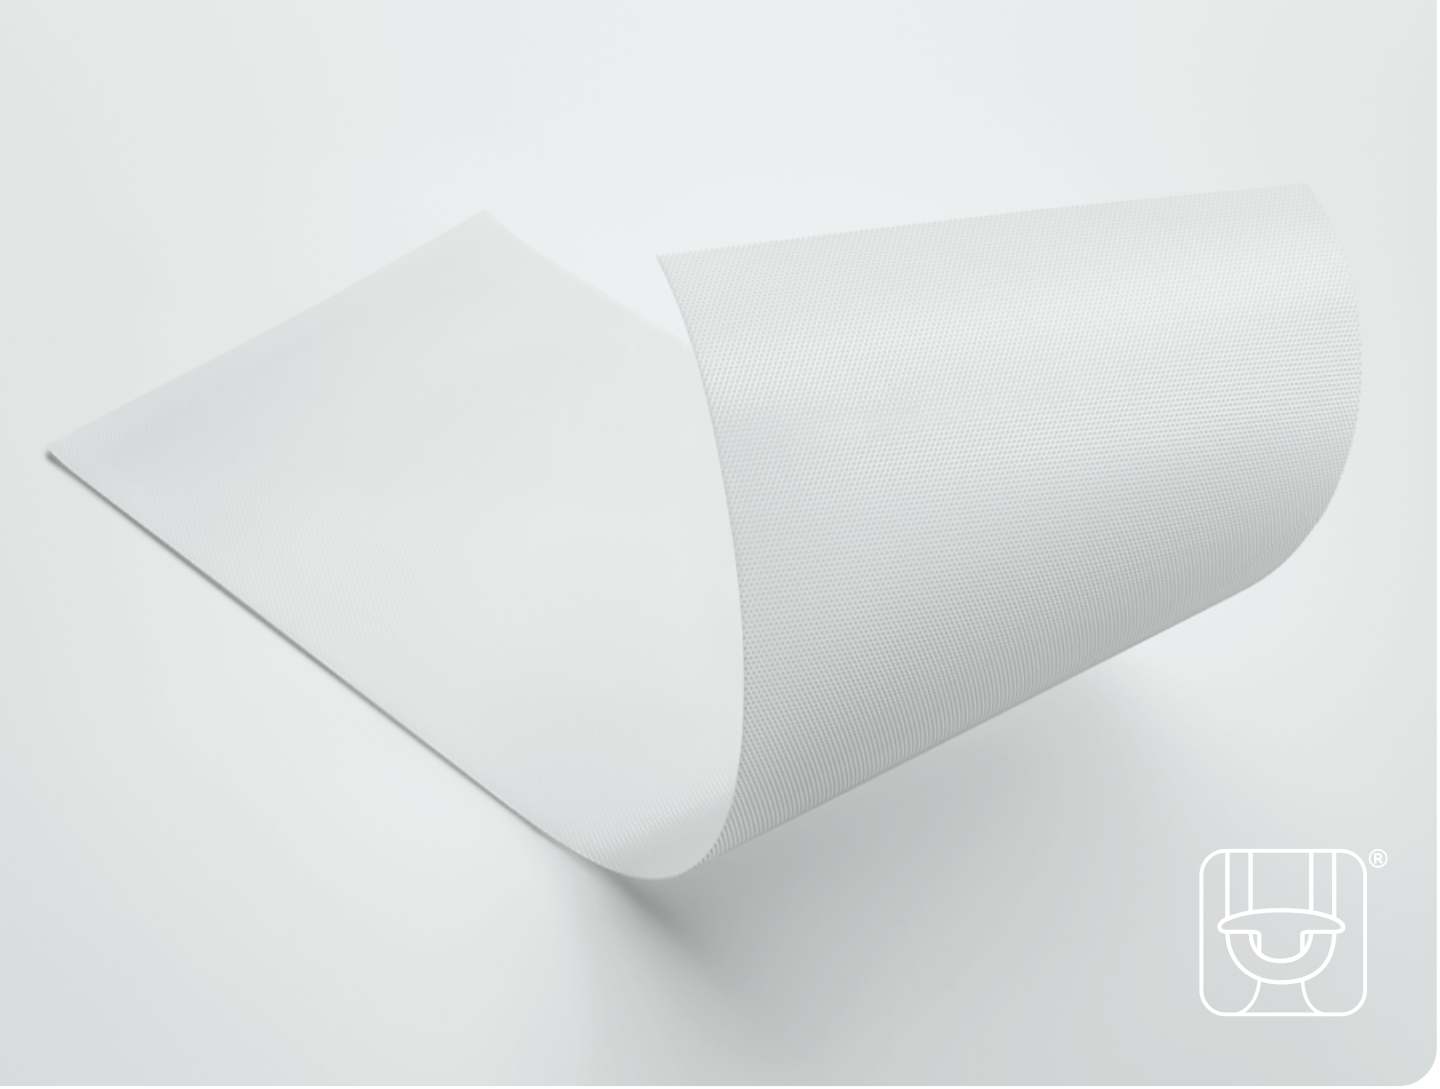

Velour FR

- Low thickness and weight for sustainable solutions
- Available as broadcloth for the efficient production of cost-effective fasteners

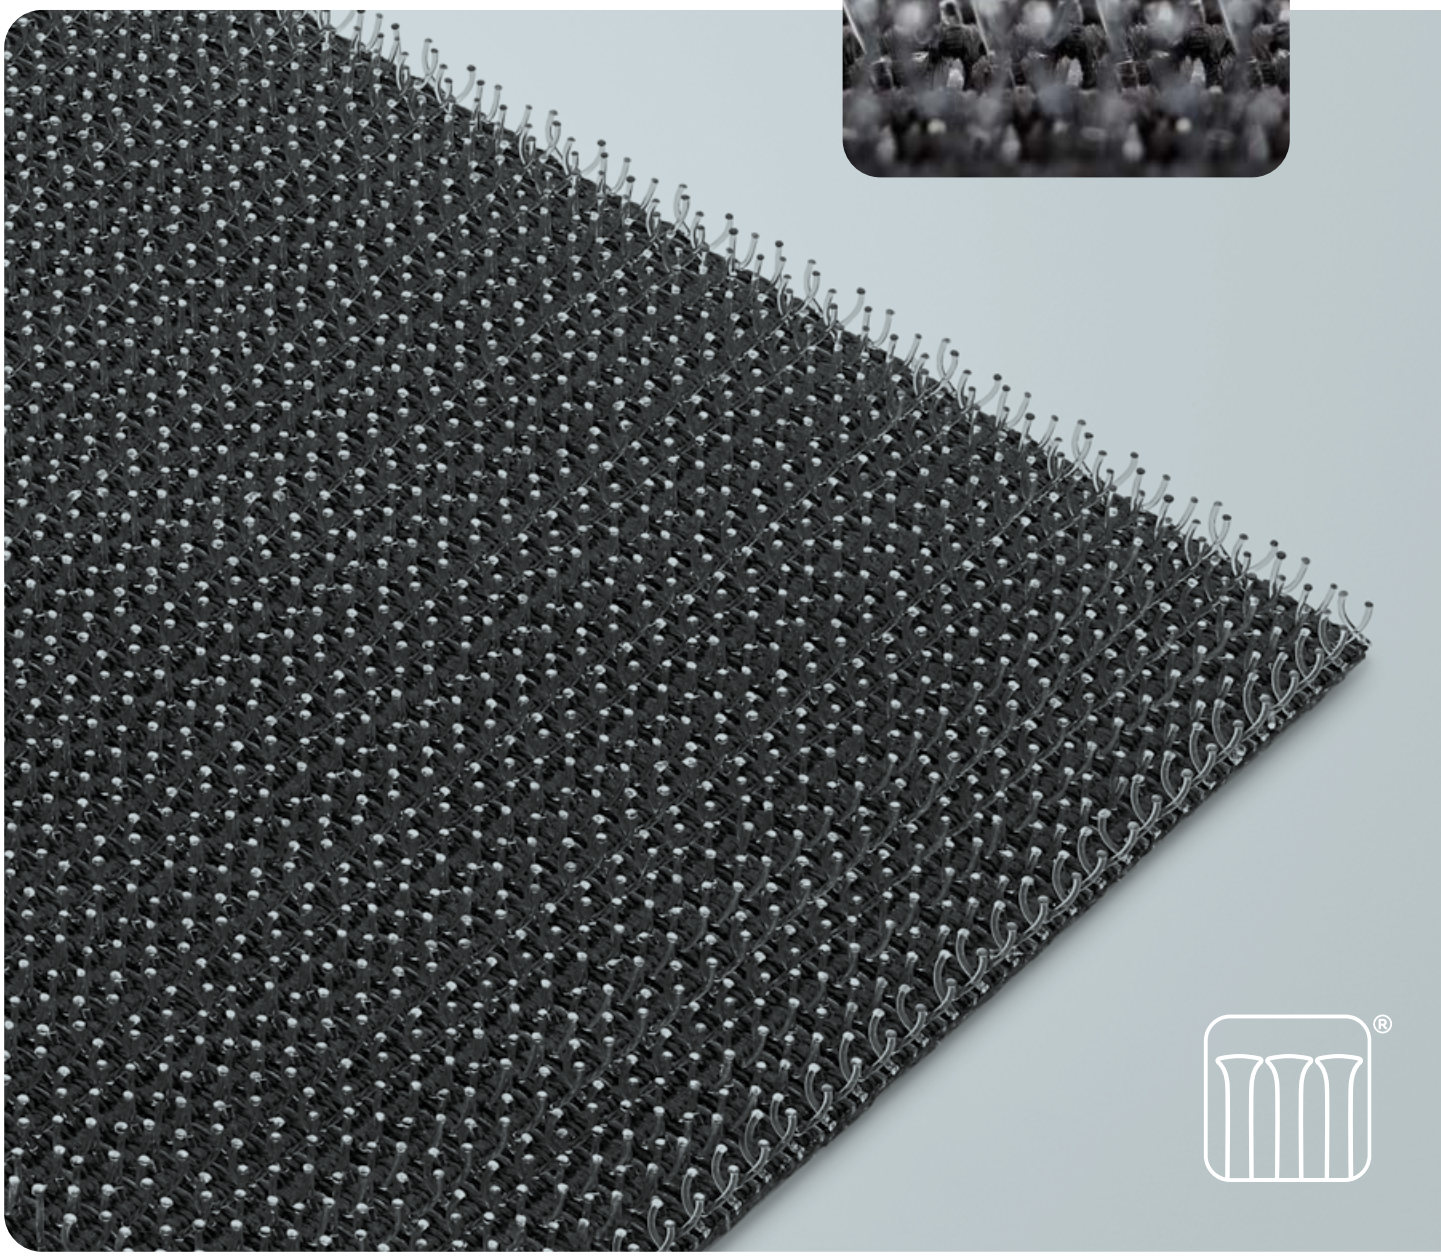

TUFF

- Touch-activated ultra-thin film fastener (TUFF)
- Self-adhesive, weldable, sewable
- Available in PP and PA
- Flame-retardant
- Available on plastic profiles and as geometric shapes
- Universal hooks with direction-independent functionality

Binder SoloHook®

- Durable floor mat fastening
- Maximum safety
- Cost efficient: no counterpart required on the floor covering
- Strong design
- Weight-saving
- Gentle on the floor covering material
- Recyclable: Made from one material (polyester)
- Easy and safe repositioning of the mat for cleaning purposes

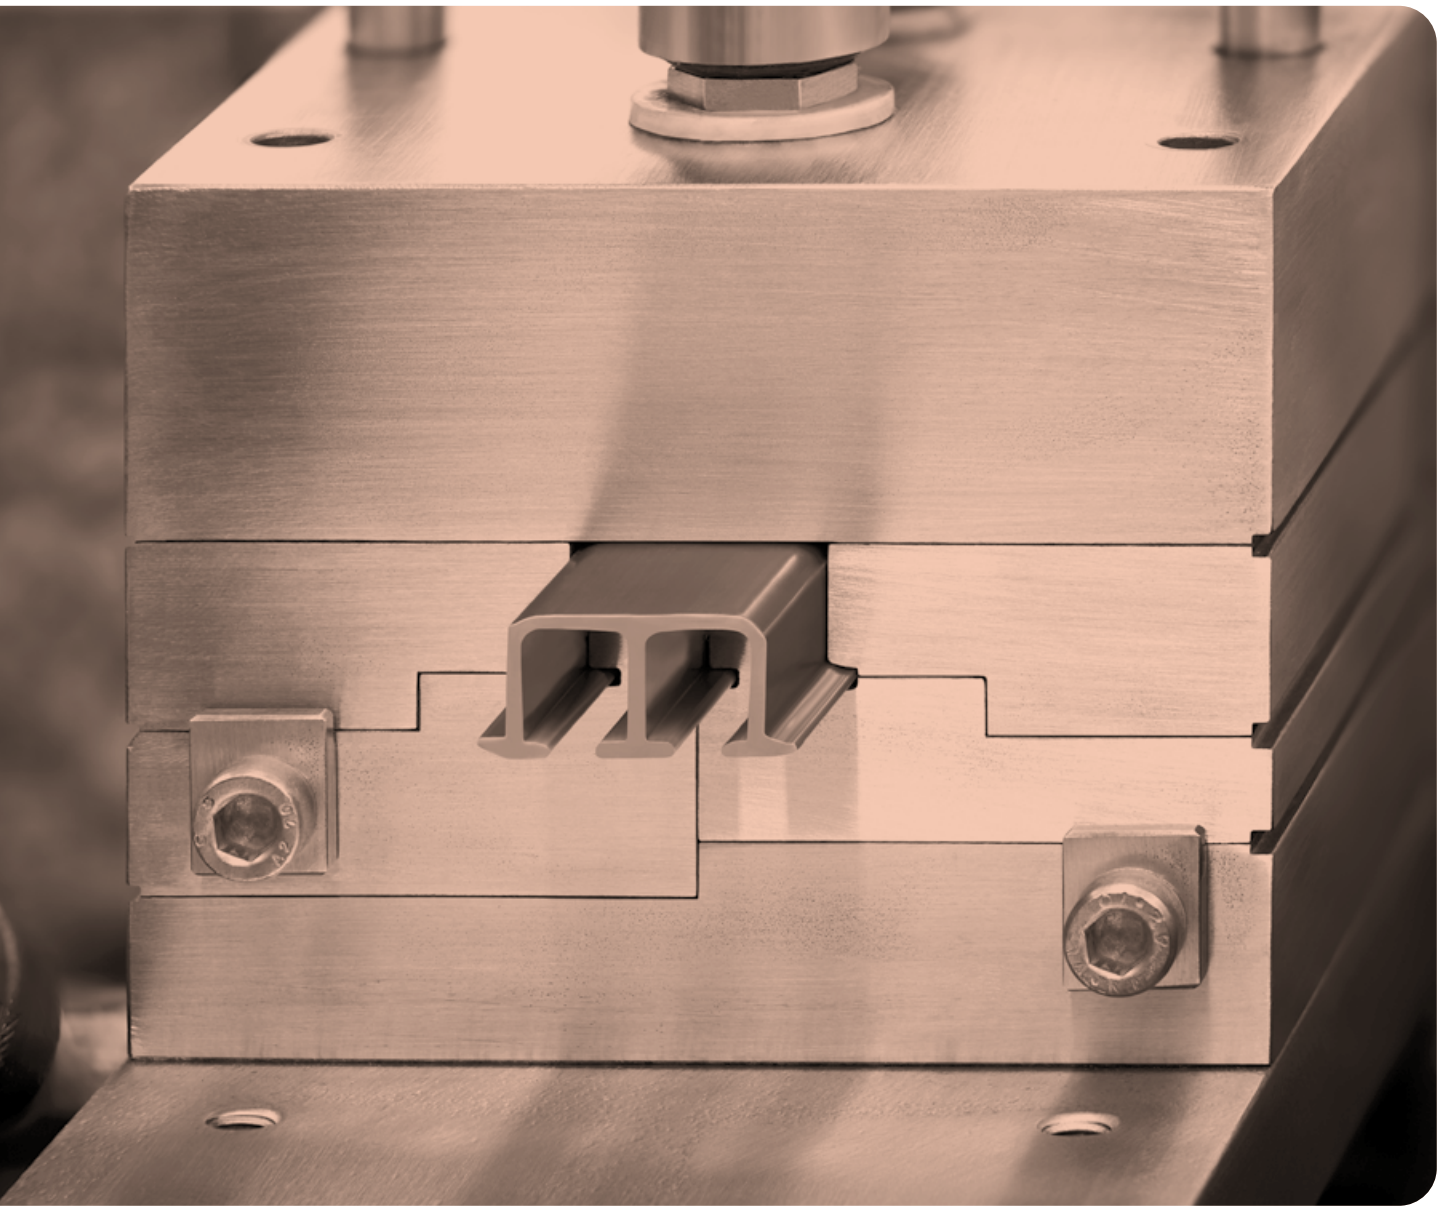

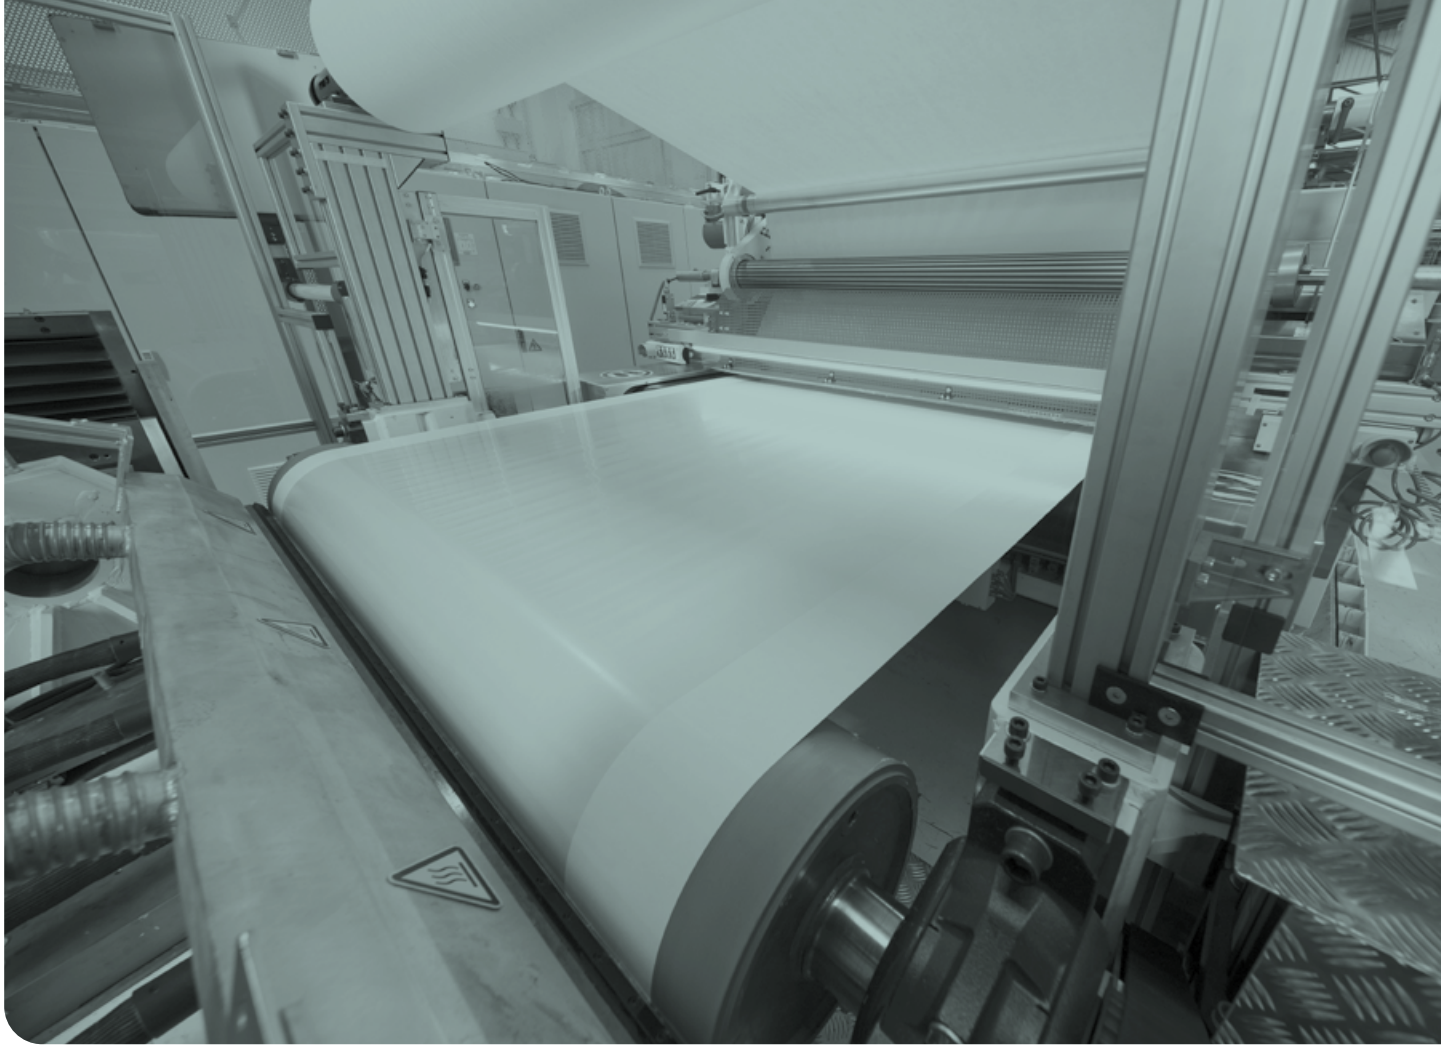

Profile extrusion & injection moulding

Profiled in extrusion technology: We produce profile shapes from all common plastics on our own profile extrusion lines according to your requirements.

- Inline application of fastener systems using our expertise in surface and adhesive technology
- Application and customer-specific injection-moulded parts can be supplied as complete fastener assemblies
- Production of large quantities of fastener systems in consistently high quality in the shortest possible time

Adhesives

In cases where our fastening systems need to be bonded to other surfaces, our expertise ensures a secure hold. We can adapt the formulations of adhesives or develop them ourselves and apply a wide variety of adhesive types on our products in large-scale production. Alternatively, we can offer films for a wide range of processing methods, e.g. ultrasonic and high frequency welding.

- Different adhesive systems
- Synthetic rubber adhesives
- Acrylic adhesives
- Welding and reactive films
- For high and low energy surfaces
- Flame-retardant
